

Phil Jones (#1033) is always coming up with interesting cards and covers. One recent find is a cover confirming the user of U.S. pattern M66. The cover was mailed from Philadelphia and carries the corner card of McIlvaine Brothers, a match for the perfin pattern.

Jones also came up with a post card with the FOK pattern (F142). The U.S. catalog identifies the pattern as having been used by Farwell Ozmun Kirk Company of St. Paul, MN, but the post card pictures the headquarters of Foley Brothers & Kelly of the same city. The address

side of the card provides a clue to the relationship. It's a "salesman will call" notice which indicates that the sender is "representing FOK&Co."

The card also says it is "No. 9 in a series of 26" such cards. That raises the question of what the other 25 cards show. Did Farwell Ozmun picture other customers or suppliers on other cards in the series? Has anyone else seen any of the other cards?
